Education

Warsaw School of Economics — Warsaw, PL
Executive MBA, MBA for Startups — 12/2022 - 05/2025

Warsaw University of Technology — Warsaw, PL
M.Sc. in Engineering, Automatic Control and Robotics — 03/2020 - 06/2022

Warsaw University of Technology — Warsaw, PL
B.Sc. in Engineering, Automatic Control and Robotics — 09/2015 - 02/2020

Professional Experience

Complexio — Warsaw, PL
Software Engineer — 11/2025 - Present

- Led migration of multiple Python applications to standardized application framework, improving code maintainability and deployment consistency across the platform.
- Designed and developed automation orchestration system components (analyser, automator, opportunity services) leveraging asyncio and batch processing patterns.
- Refactored monolithic applications into proper Python packages with optimized Docker builds, reducing image build times and improving dependency management.
- Enhanced system reliability through advanced debugging tools including SIGUSR1 signal handlers, thread/coroutine dumps, and structured logging frameworks.
- Led migration of 5 microservices from SQLite/JSON to PostgreSQL using asyncpg, designing schemas, repository layers, and automated data migration tooling.
- Built a full-stack user-to-user sharing system for signals, artifacts, and documents with granular permissions and cross-user visibility controls.
- Replaced openpyxl with Polars-based profiler for smart spreadsheet extraction, enabling row-aware truncation and handling of large XLSX files.
- Optimized Python service memory usage by integrating jemalloc and bypassing pymalloc, resolving memory retention issues under sustained load.
- Designed internal HTTP APIs for service-to-service communication (signal, scheduler), replacing file-based reads and enabling independent scaling.

Box Inc. — Warsaw, PL
Software Engineer — 01/2023 - 10/2025

- Built automation tools in Python integrating Temporal.io, JIRA, Jenkins, Git, and GCP; reduced recurring DevOps tasks by over 50%.
- Led a comprehensive modernization of legacy internal tools, unlocking up to 10x speed improvements and reinforcing system reliability while elevating the overall developer experience.
- Architected and implemented scalable backend services in Python and Scala leveraging GCP technologies (Pub/Sub, Dataflow, BigTable, BigQuery) and MySQL connectivity.
- Designed and implemented a FastAPI-based API Factory to standardize delivery across 10+ areas, significantly reducing time-to-market and ensuring cross-functional alignment.
- Led cross-service performance tuning initiatives, optimizing resource usage and reducing latency in key pipelines.

Deloitte Consulting S.A. — Warsaw, PL
Senior Specialist — 09/2021 - 12/2022

- Developed automation tools in Python and Java for cutover processes, reducing manual deployment time by 40%.
- Built data processing pipelines for test automation and GDPR-compliant anonymization, cutting data prep time by 60%.
- Integrated Kafka, REST APIs, and IBM MQ to enhance cross-system data reliability and monitoring.

Deloitte Consulting S.A. Warsaw, PL
Consultant 10/2018 - 08/2021

- Architected and maintained an internal ETL platform; drove 100x performance improvements under tight deadlines.

Joint Institute for Nuclear Research Dubna, RU
Intern 07/2017 - 09/2017

Leadership Experience

WellMate Remote / Poland
Technical Co-Founder 2023 – Present

- Designed and implemented a cloud-native architecture on GCP, orchestrating App Engine, Cloud SQL (PostgreSQL), and BigQuery to support multi-platform mobile applications with 99.9%+ uptime.
- Architected a RESTful API ecosystem serving Kotlin Multiplatform clients (iOS/Android), implementing synchronization protocols, internationalization support, and AI-powered feature integrations.
- Developed and published 4 Kotlin Multiplatform libraries (API Client, RoomDB, UI Components, Barcode Scanner) as reusable Maven packages consumed across iOS and Android.
- Built OAuth2/PKCE health integrations with third-party providers, implementing full stack from database schema through backend services to mobile UI.
- Designed a gamification engine with 56 badges, streak tracking, and an evaluation system driving user engagement across the platform.
- Integrated AI-powered food analysis with barcode scanning (OpenFoodFacts, FatSecret) and image recognition for nutritional tracking.
- Wrote 128+ Android instrumented tests with GCP Secret Manager for secure CI credentials and Playwright-based visual regression tests.
- Migrated the full app stack to AGP 9, Kotlin 2.3, and Compose Multiplatform 1.10, staying on the cutting edge of KMP tooling.

LBC Phase 2 Remote / Canada
Technical Lead 2022

Skills & Personal

Programming Languages: Python, Kotlin (incl. Kotlin Multiplatform), Rust, Scala, Java, C, C++
Databases: PostgreSQL (asyncpg), Oracle, MySQL, RealmDB, BigQuery, QuestDB, MongoDB, Memgraph
Frameworks & Tools: FastAPI, Flask, Compose Multiplatform, Polars, Jenkins, Git, JIRA, Temporal.io
Concurrency & Performance: Multiprocessing, multithreading, parallel computing, jemalloc, performance tuning with profilers
Architecture: Modular systems design, shared libraries, design patterns (e.g. MVC)
ML & AI: MLflow, DINOv2, LaMa, SPAN, OpenAI, Google Gemini
Productivity Tools: Microsoft Office Suite, Cutover Tool
Languages: Polish (native), English (fluent), German (beginner)

Certifications

- Cambridge English: Advanced (CAE)

Additional

- **Licenses & Certifications:** Accelerator Design With OpenCL – Télécom Paris (2021)
- **Volunteering:** Volunteer/Coordinator – Uwolnij Złomka (2021)

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
