Education

Warsaw School of Economics — Warsaw, PL
Executive MBA, MBA for Startups — 12/2022 - 05/2025

Warsaw University of Technology — Warsaw, PL
M.Sc. in Engineering, Automatic Control and Robotics — 03/2020 - 06/2022

Warsaw University of Technology — Warsaw, PL
B.Sc. in Engineering, Automatic Control and Robotics — 09/2015 - 02/2020

Professional Experience

Complexio — Warsaw, PL
Senior Software Engineer — 11/2025 - Present

- Owned the migration of a production LLM agent platform from Podman to Kubernetes (k0s/AKS) with Helm and Flux GitOps across ~9 enterprise customer environments, verifying configuration parity with zero semantic differences across 1,697 environment keys.
- Built provider-independent LLM inference across Anthropic, Azure AI Foundry, and AWS Bedrock; delivered the Bedrock baseline in 3 weeks against a 2-month plan, with Terraform and least-privilege IAM for an enterprise customer's AWS deployment.
- Led migration of 5 microservices from SQLite/JSON to PostgreSQL using asyncpg, designing schemas, repository layers, internal HTTP APIs, and automated data migration tooling.
- Served as release manager and on-call incident responder for a multi-customer release train, leading root-cause analyses across networking, Kubernetes, databases, and LLM providers, including vendor escalations with Microsoft.
- Drove a cross-team CI reliability effort: reduced flaky-test failure probability from ~80% to ~2% per run, cut build times from 45s to 6s (~12 CI hours saved daily), and type-checking from up to 15 minutes to 45s.
- Designed a gVisor-sandboxed code-execution platform for LLM agents, S3-backed file storage, and brand-aware document generation (DOCX, PPTX, PDF, XLSX).
- Architected observability with Prometheus, Datadog, and PagerDuty (dashboards, alerting, runbooks), plus ephemeral CI-driven review environments and Kubernetes-based local development infrastructure.
- Reduced memory footprint of data-heavy services by 50–70% with a Polars-based spreadsheet profiler and jemalloc/pymalloc allocator tuning.
- Mentored engineers into owning releases and customer onboarding; authored reusable AI-agent (Claude Code) skills and runbooks that made environment onboarding self-service.

Box Inc. — Warsaw, PL
Software Engineer — 01/2023 - 10/2025

- Built automation tools in Python integrating Temporal.io, JIRA, Jenkins, Git, and GCP; reduced recurring DevOps tasks by over 50%.
- Led a comprehensive modernization of legacy internal tools, unlocking up to 10x speed improvements and reinforcing system reliability while elevating the overall developer experience.
- Architected and implemented scalable backend services in Python and Scala leveraging GCP technologies (Pub/Sub, Dataflow, BigTable, BigQuery) and MySQL connectivity.
- Designed and implemented a FastAPI-based API Factory to standardize delivery across 10+ areas, significantly reducing time-to-market and ensuring cross-functional alignment.
- Migrated infrastructure to Google Kubernetes Engine (GKE), boosting observability, uptime, and deployment scalability.
- Led cross-service performance tuning initiatives, optimizing resource usage and reducing latency in key pipelines.

Deloitte Consulting S.A. Warsaw, PL
Senior Specialist 09/2021 - 12/2022

- Designed and delivered migration demos for complex financial systems (T24, Vault), helping secure client engagements.
- Developed automation tools in Python and Java for cutover processes, reducing manual deployment time by 40%.
- Built data processing pipelines for test automation and GDPR-compliant anonymization, cutting data prep time by 60%.
- Integrated Kafka, REST APIs, and IBM MQ to enhance cross-system data reliability and monitoring.
- Led a 4-person team on a Canadian T24 migration project, owning architecture, roadmap, and client delivery.

Deloitte Consulting S.A. Warsaw, PL
Consultant 10/2018 - 08/2021

- Supported delivery teams in Slovakia and Hungary with custom transformation logic and QA pipelines for 50M+ record migrations.
- Architected and maintained an internal ETL platform; drove 100x performance improvements under tight deadlines.
- Managed versioning and deployment of Oracle DB schema changes in enterprise banking systems.
- Onboarded 4+ junior developers and contributed to team knowledge sharing and mentorship.

Joint Institute for Nuclear Research Dubna, RU
Intern 07/2017 - 09/2017

- Designed a cooling control system on National Instruments PXI hardware and a Slow Control system for real-time monitoring of NICA experimental modules.
- Programmed real-time and FPGA-based systems in LabView and integrated a high-voltage power supply via Modbus; presented at "NICA Days 2017."

Leadership Experience

WellMate Remote / Poland
Technical Co-Founder 2023 – 08/2026

- Co-founded a wellness app startup with support from Warsaw School of Economics.
- Designed and implemented a cloud-native architecture on GCP, orchestrating App Engine, Cloud SQL (PostgreSQL), and BigQuery to support multi-platform mobile applications with 99.9%+ uptime.
- Established GitHub Actions CI/CD with Flyway database migrations, blue-green zero-downtime releases, and emulator-based runtime and Playwright visual regression tests.
- Architected a RESTful API and a modular Kotlin Multiplatform library ecosystem (MVVM, clean architecture, published as Maven packages) serving iOS and Android clients.
- Developed full-stack features including OAuth2/PKCE health provider integrations, a gamification engine with badges and streaks, and AI-powered nutritional tracking with barcode scanning.
- Mentored a diverse, cross-functional team (UX/UI, software development, marketing).

Skills & Personal

Programming Languages: Python, Kotlin (incl. Kotlin Multiplatform), Rust, Scala, Java, C, C++
Cloud Platforms: Google Cloud Platform (GCP), Microsoft Azure (AKS, AI Foundry), AWS (Bedrock, IAM), IBM Cloud
Databases: PostgreSQL (asyncpg), Oracle, MySQL, RealmDB, BigQuery, QuestDB, MongoDB, Memgraph
Frameworks & Tools: FastAPI, Flask, Compose Multiplatform, Polars, Jenkins, Git, JIRA, Temporal.io
Concurrency & Performance: Multiprocessing, multithreading, parallel computing, jemalloc, performance tuning with profilers
Architecture: Modular systems design, shared libraries (Repository, Facade, Strategy, Pipeline, MVVM, Circuit Breaker, Event-Driven)
Data Pipelines: Apache Kafka, Redpanda, Google Pub/Sub, IBM MQ, Dataflow

LLM & AI: Anthropic Claude, AWS Bedrock, Azure AI Foundry, OpenAI, Google Gemini, agentic workflows, MCP, MLflow
Infrastructure: Kubernetes (k0s, AKS), Helm, Flux/GitOps, Terraform, gVisor, Docker/Podman, Traefik, HAProxy, Authentik, WireGuard
Observability: Datadog, Prometheus, PagerDuty
Banking Systems: Temenos T24, Vault
Productivity Tools: Microsoft Office Suite, Cutover Tool
Languages: Polish (native), English (fluent), German (beginner)

Certifications

- GCP Professional Cloud Architect
- AWS Certified Cloud Practitioner
- Microsoft Azure Fundamentals (AZ-900)
- Cambridge English: Advanced (CAE)
- Mambu Solution Consultant I
- nCino: 201 Commercial Banking Functional

Additional

- **Licenses & Certifications:** Accelerator Design With OpenCL – Télécom Paris (2021)
- **Volunteering:** Volunteer/Coordinator – Uwolnij Złomka (2021)
- **Leadership & Competitions:** Start-up Manager – Warsaw University of Technology (2021)
- **Training Programs:** Core Banking TechLab – Deloitte Consulting S.A. (2019)

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
