Education

Warsaw School of Economics — Warsaw, PL
Executive MBA, MBA for Startups — 12/2022 - 05/2025

Warsaw University of Technology — Warsaw, PL
M.Sc. in Engineering, Automatic Control and Robotics — 03/2020 - 06/2022

Warsaw University of Technology — Warsaw, PL
B.Sc. in Engineering, Automatic Control and Robotics — 09/2015 - 02/2020

Professional Experience

Complexio — Warsaw, PL
Software Engineer — 11/2025 - Present

- Architected and implemented comprehensive observability infrastructure using Prometheus and Datadog, enabling distributed tracing and performance monitoring across microservices.
- Led migration of Python applications to a standardized framework, refactoring monoliths into proper packages with optimized Docker builds for improved maintainability and deployment consistency.
- Designed and developed automation orchestration system components leveraging asyncio and batch processing patterns for data analysis and workflow automation.
- Built Kubernetes/Podman-based local development infrastructure and ephemeral CI-driven review environments, streamlining developer onboarding and feature validation.
- Led migration of 5 microservices from SQLite/JSON to PostgreSQL using asyncpg, designing schemas, repository layers, internal HTTP APIs, and automated data migration tooling.
- Built a full-stack user-to-user sharing system for reports, artifacts, and documents with granular permissions and cross-user visibility controls.
- Replaced openpyxl with Polars-based profiler for smart spreadsheet extraction, enabling row-aware truncation and handling of large XLSX files.
- Enhanced system reliability through jemalloc integration, pymalloc bypass for memory optimization, SIGUSR1 debugging tools, and structured logging frameworks.

Box Inc. — Warsaw, PL
Software Engineer — 01/2023 - 10/2025

- Built automation tools in Python integrating Temporal.io, JIRA, Jenkins, Git, and GCP; reduced recurring DevOps tasks by over 50%.
- Led a comprehensive modernization of legacy internal tools, unlocking up to 10x speed improvements and reinforcing system reliability while elevating the overall developer experience.
- Architected and implemented scalable backend services in Python and Scala leveraging GCP technologies (Pub/Sub, Dataflow, BigTable, BigQuery) and MySQL connectivity.
- Designed and implemented a FastAPI-based API Factory to standardize delivery across 10+ areas, significantly reducing time-to-market and ensuring cross-functional alignment.
- Migrated infrastructure to Google Kubernetes Engine (GKE), boosting observability, uptime, and deployment scalability.
- Led cross-service performance tuning initiatives, optimizing resource usage and reducing latency in key pipelines.

Deloitte Consulting S.A. — Warsaw, PL
Senior Specialist — 09/2021 - 12/2022

- Designed and delivered migration demos for complex financial systems (T24, Vault), helping secure client engagements.
- Developed automation tools in Python and Java for cutover processes, reducing manual deployment time by 40%.

- Built data processing pipelines for test automation and GDPR-compliant anonymization, cutting data prep time by 60%.
- Integrated Kafka, REST APIs, and IBM MQ to enhance cross-system data reliability and monitoring.
- Led a 4-person team on a Canadian T24 migration project, owning architecture, roadmap, and client delivery.

Deloitte Consulting S.A. Warsaw, PL
Consultant 10/2018 - 08/2021

- Supported delivery teams in Slovakia and Hungary with custom transformation logic and QA pipelines for 50M+ record migrations.
- Architected and maintained an internal ETL platform; drove 100x performance improvements under tight deadlines.
- Managed versioning and deployment of Oracle DB schema changes in enterprise banking systems.
- Onboarded 4+ junior developers and contributed to team knowledge sharing and mentorship.

Joint Institute for Nuclear Research Dubna, RU
Intern 07/2017 - 09/2017

- Designed a cooling control system using National Instruments PXI hardware, improving thermal stability for NICA experiments.
- Developed a Slow Control system for real-time monitoring and regulation of experimental modules.
- Programmed real-time and FPGA-based systems in LabView to support low-latency data acquisition.
- Integrated a high-voltage power supply via Modbus, enhancing operational safety and device interoperability.
- Implemented a hardware security lock system to reduce human error in RACK access and servicing.
- Presented at "NICA Days 2017," contributing to international scientific collaboration.

Leadership Experience

WellMate Remote / Poland
Technical Co-Founder 2023 – Present

- Co-founded a wellness app startup with support from Warsaw School of Economics.
- Designed and implemented a cloud-native architecture on GCP, orchestrating App Engine, Cloud SQL (PostgreSQL), and BigQuery to support multi-platform mobile applications with 99.9%+ uptime.
- Established Infrastructure as Code practices with GitHub Actions CI/CD pipelines, automated database migrations via Flyway, and blue-green deployment strategies for zero-downtime releases.
- Architected a RESTful API ecosystem serving Kotlin Multiplatform clients (iOS/Android), implementing synchronization protocols, internationalization support, and AI-powered feature integrations.
- Built a modular Kotlin Multiplatform library ecosystem following MVVM and clean architecture principles, published as Maven packages and consumed across iOS and Android.
- Developed full-stack features including OAuth2/PKCE health provider integrations, a gamification engine with badges and streaks, and AI-powered nutritional tracking with barcode scanning.
- Built a near-self-testing CI/CD pipeline with Android emulator-based runtime tests, GCP Secret Manager for secure credentials, and Playwright visual regression checks.
- Migrated the full app stack to AGP 9, Kotlin 2.3, and Compose Multiplatform 1.10, staying on the cutting edge of KMP tooling.
- Mentored a diverse, cross-functional team (UX/UI, software development, marketing).

LBC Phase 2 Remote / Canada
Technical Lead 2022

- Led a 4-person engineering team to document and evaluate technical implementations from Phase 1 of a core banking migration project.
- Owned analysis and comparison of system adjustments across phases, contributing to delivery planning and cross-team alignment.

Skills & Personal

Programming Languages: Python, Kotlin (incl. Kotlin Multiplatform), Rust, Scala, Java, C, C++
Cloud Platforms: Google Cloud Platform (GCP), Microsoft Azure, AWS, IBM Cloud
Databases: PostgreSQL (asyncpg), Oracle, MySQL, RealmDB, BigQuery, QuestDB, MongoDB, Memgraph
Frameworks & Tools: FastAPI, Flask, Compose Multiplatform, Polars, Jenkins, Git, JIRA, Temporal.io
Concurrency & Performance: Multiprocessing, multithreading, parallel computing, jemalloc, performance tuning with profilers
Architecture: Modular systems design, shared libraries (Repository, Facade, Strategy, Pipeline, MVVM, Circuit Breaker, Event-Driven)
Data Pipelines: Apache Kafka, Redpanda, Google Pub/Sub, IBM MQ, Dataflow
ML & AI: MLflow, DINOv2, LaMa, SPAN, OpenAI, Google Gemini
Infrastructure: Traefik, Authentik, WireGuard, Docker/Podman, Kubernetes
Banking Systems: Temenos T24, Vault
Productivity Tools: Microsoft Office Suite, Cutover Tool
Languages: Polish (native), English (fluent), German (beginner)

Certifications

- GCP Professional Cloud Architect
- GCP Associate Cloud Engineer (expired)
- AWS Certified Cloud Practitioner
- Microsoft Azure Fundamentals (AZ-900)
- Cambridge English: Advanced (CAE)
- Mambu Solution Consultant I
- nCino: 201 Commercial Banking Functional

Additional

- **Licenses & Certifications:** Accelerator Design With OpenCL – Télécom Paris (2021)
- **Volunteering:** Volunteer/Coordinator – Uwolnij Złomka (2021)
- **Leadership & Competitions:** Start-up Manager – Warsaw University of Technology (2021)
- **Training Programs:** Core Banking TechLab – Deloitte Consulting S.A. (2019)

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
